

Staff and residents are overjoyed with specialist seating

A MOBILITY company that provide seating solutions for care home residents is being praised by a Gloucester care facility. Your Mobility provided Cavendish Care Home with almost 20 specialist chairs, improving the quality of lives and comfort for residents.

Manager at the care home, Dan Bridges, said: "My goal is to support older people and my mission is to provide a high quality of care to our residents, so I decided that we needed to research and find some good specialist seats for our residents."

The chairs are designed to give each user better posture, pressure relief and prevent falls, and the Your Mobility team provide carers with free training, so each chair can be used to its full advantage.

A spokesperson from Your Mobility said: "It's amazing how something as commonplace as a chair, when designed for those with specific needs, can make a massive difference to a service user's quality of life."

The team from Your Mobility can direct their clients towards funding that will often allow chairs to be obtained without worrying about the cost.

Dan says he would recommend the company to anyone looking to invest in specialist seating solutions, with residents families getting behind the benefits Your Mobility products have for older people.

Dan added: "They're not a pushy company at all, they actually gave us one of the chairs to use to see if we liked it, and they are brilliant. I really can't rate them highly enough, the proof was in the pudding, and these chairs definitely work."

"I have a very strong working relationship with all of my families, and it was actually the families that bought the chairs for the residents."

Dan is always looking for new and innovative ways that he can help his residents have an easier and more comfortable life within his facility.

He said: "Our carers wear pyjamas in the night so that if residents wake up and see other people in their pyjamas, they understand it's time for bed. Because we've got people there who have very high and complex needs its something that I do to make their lives easier."

Cavendish care home is a private facility with 24 residents that is owned by Graham Rigby.

The premises has been rated as good by the CQC, and provides specialist care for residents with Alzheimer's.
